

ANKER Capital Management AG Sustainable Finance Disclosure

In accordance with the European Union's understanding of sustainability, which is not limited solely to ecological aspects, but should instead consider the entire ESG spectrum (Environment, Social, and Governance). In this regard, the company is subject to disclosure obligations from the Sustainable Finance Disclosure Regulation (Disclosure Regulation). In accordance with these disclosure obligations, we state the following:

"The company is aware of its responsibility to ensure a liveable future for the next generations. The company is currently not implementing the strategies provided for by EU regulations for the inclusion of sustainability risks in the investment decision process or investment advisory process and therefore does not take into account the adverse impacts on sustainability factors. This is due, among other things, to the fact that not all relevant information is available yet. The company's remuneration policy does not set negative incentives to disregard sustainability risks. However, we will closely monitor developments in this area and will inform about any changes here."
